QUICK START GUIDE

Connecting your phone with bluetooth. Using aha*, Push-to-talk & Navigation.

*Refer to the aha Quick Start Guide for set-up instructions.

BeSpoke Premium Audio System is optional equipment.

Quick Start Guide

Setting up Bluetooth® 1

Using aha

- Playing aha Radio 2
- Selecting a Preset 2
- Viewing a Station List 2
- Finding aha Nearby Destinations 3
- Calling/Navigating to a Nearby Destination 3

Push-to-Talk

- Voice Commands 4

Navigation

- When to use aha vs. BeSpoke navigation 5
- Entering an Address — Voice Command/One Shot Destination 6
- Stopping Navigation 6
- Entering an Address — Manual 7

1 Setting up Bluetooth

Connecting a phone through Bluetooth

Bluetooth connection required for:

1. Phone use through the BeSpoke Premium Audio System.
2. Android phone use with aha features of BeSpoke Premium Audio System.

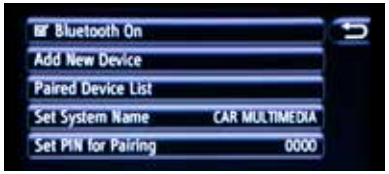
① On your phone, make sure Bluetooth is on.

② Select ***Setup***.

③ Select ***Bluetooth***.

**On Android devices, you will need to make your phone visible to searching devices.*

④ Select ***Add New Device***.



⑤ Select ***Search for Bluetooth Devices****

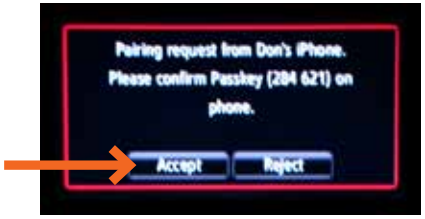
⑥ Select a phone to connect BeSpoke to.

A pairing message will appear on the BeSpoke screen.

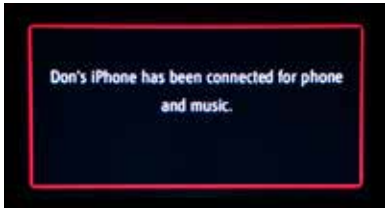
⑦ On your phone, select ***Pair*** when the pair request message appears.

Bluetooth Pairing Request
"Handsfree" would like to pair with your iPhone. Confirm that the code "549238" is shown on "Handsfree".
Cancel
Pair

⑧ Select ***Accept*** on the BeSpoke screen to complete connection.



⑨ After pairing has been confirmed, your phone and BeSpoke will both show they are ***Connected***.



Be sure to obey traffic regulations and maintain awareness of road and traffic conditions at all times.

2 Using aha

Playing aha Radio

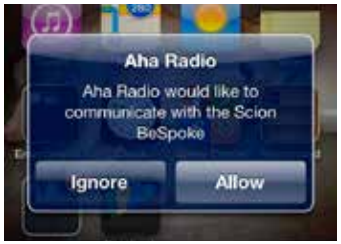
iPhone: Plug in and connect USB. Bluetooth connection required for call features.

Android: Connect to Bluetooth.

① Select ***Audio.***

② Select ***aha.***

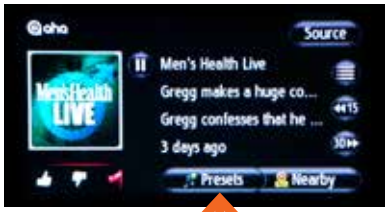
③ On your phone, a request to allow aha to launch will appear—***Select Allow.***



Aha will automatically launch the last station played.

Selecting a Preset

① Choose ***Presets*** button.



② ***Scroll*** to view all ***Presets.***

③ ***Select*** a preset.

④ Your preset will automatically start playing.

Viewing a Station List

① Listen to previous broadcasts. Choose ***list icon.***

② Browse by using the scroll bar. Select the podcast you want to listen to.

IMPORTANT

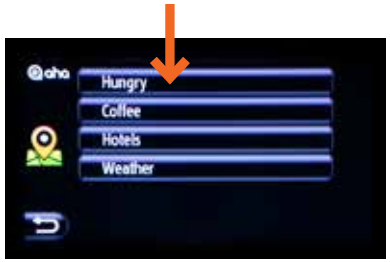
To use aha you must have a data plan for your smartphone (minimum 2GB plan recommended), access to a Wi-Fi network, or data connectivity through a portable hotspot device.

3 Using aha

Finding aha Nearby Destinations

① Select ***Nearby.***

② Select a nearby category.



③ aha will automatically start reading nearby destinations based on nearest location. Select list to view all nearby destinations at once.

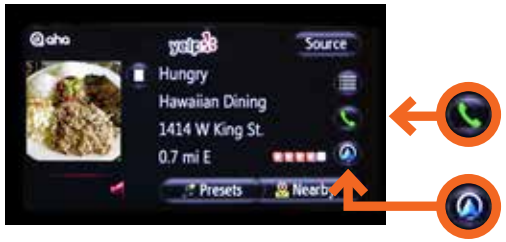
④ ***Scroll*** through the list and ***select*** a destination.

⑤ Screen will show useful destination information.

Calling/Navigating to a Nearby Destination

① To call a nearby destination push the ***Phone Button.***

To navigate to nearby destination push the ***Blue Arrow Button.***



② The screen will switch to phone mode and dial/navigation mode to start route.

Be sure to obey traffic regulations and maintain awareness of road and traffic conditions at all times.

4 Push to Talk

Voice Commands

① Select the ***Push to Talk Button.***

② Once pressed, a complete menu of voice commands will appear.

③ Choose from 32 commands.

For example, to navigate to a specific address, say “destination” followed by the address, like this:

“***destination one nine zero zero one South Western Avenue Torrance California***”

5 Navigation

When to use aha vs. BeSpoke Navigation

Use **aha Nearby** to find:

- Local restaurants, hotels, and coffee shops.
- When ratings are an important factor in your decision.
- In areas of strong data/signal strength.
- To listen to local weather updates.

aha updates happen over the cloud via the app, so aha destinations are always up to date. (Aha destinations are only available if they have been rated by Yelp or Tripadvisor.)

Use **Navigation** to find:

- Points of Interest (POIs) that are outside of aha's radius (about 5 miles depending on signal strength).
- POIs that aren't offered by aha, like gas stations, golf courses, schools, etc.
- When aha is not connected or has poor signal.
- POIs that may not have been rated on Yelp or Tripadvisor.

Navigation map and POI updates are done via your dealer.

6 Navigation

Entering an Address— Voice Command/ One Shot Destination

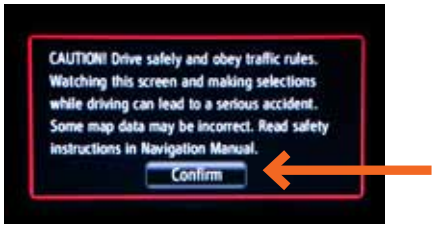
① Select the ***Push to Talk Button.***

② Once pressed, a complete menu of voice commands will appear.

Say “destination” followed by the address, like this:

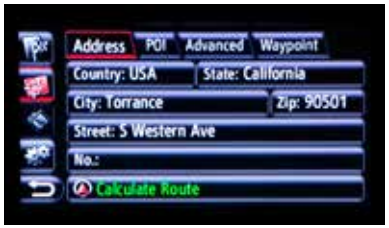
“destination one nine zero zero one South Western Avenue Torrance California”

③ Read and acknowledge warning.



CAUTION! Drive safely and obey traffic rules. Watching this screen and making selections while driving can lead to a serious accident. Some map data may be incorrect. Read safety instructions in Navigation Manual.
Confirm

④ Wait for BeSpoke to process your request. (This may take a moment. Once processed, BeSpoke will repeat the address back to you.)

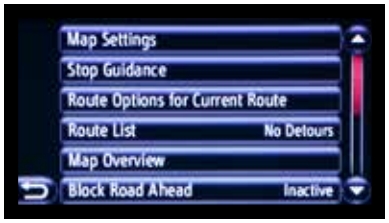


⑤ The route will launch.

⑥ The system will ask if you’d like to start route guidance. Say ***“Yes”*** to start the route navigation.

Stopping Navigation

Choose Options: stop guidance.



7 Navigation

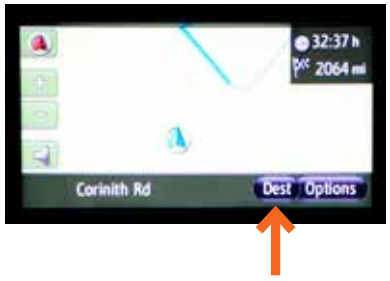
Entering an Address—Manual*

① Select ***Map.***

② Read and acknowledge warning.

CAUTION! Drive safely and obey traffic rules.
Watching this screen and making selections while driving can lead to a serious accident.
Some map data may be incorrect. Read safety instructions in Navigation Manual.
Confirm

③ Select ***Dest*** for destination.



④ Select ***Enter Destination***.

⑤ Select the field for entry.

Use keyboard to enter each field: State, City, Zip, Street, No.

⑥ Select ***Calculate Route*** after address is entered.

⑦ Choose route preferences: Fast, Short, or ecological; avoidance options; or select start.

Manual address entry is only allowed when safely parked.
